

OPTIMUS CLIP-ON WINDSHIELD™

OPTIMUS | COOKING SINCE 1899™

INSTRUCTIONS FOR USE

Take both halves and bend them slightly outwards. Clip the opening at the bottom around the valve neck of the gas canister. Make sure the windshield is fixed securely. Turn the windshield into the desired direction (to best block the wind) and make sure the stoves' control handle is easily accessible. We recommend to use this windshield only with the Optimus Crux and Crux Lite gas stoves and Optimus gas canisters.

WARNING

Risk of burning or serious injuries due to incorrect handling.

- **Always fit windshield before lighting the stove.**
- **Always leave a gap of approximately 5 mm between pot and windshield to avoid overheating.**
- **Never use stoves on which the flames are pointing sideways in combination with this windshield.**
- **Never put empty cookware on a burning stove.**
